*Vortrag im Rahmen dieses Seminars*

Titel:

**The Energy Strategic Landscape in North Africa**

Autor:

**Dr. Sami Ben Rejeb**

Abstract:

Dr. Ben Rejeb will present the overall energy landscape in North Africa, with a focus on Mauritania, Morocco, Algeria, Tunisia, Libya, and Egypt. The presentation will address both renewable energy (including green hydrogen) and fossil resources, emphasizing production potential and transport routes to Europe, particularly Germany.

The core message and guiding theme will revolve around investment opportunities and bottlenecks, exploring how Germany, as a country, and German companies, as private actors, can strategically engage with North Africa's evolving energy landscape.
