University of Cologne

Department of Economics – Chair in Economics and Energy Economics
PD Dr Dietmar Lindenberger

Bachelor Seminar Energy Economics

Modul No. 14289.0807 (SE) BA

Summer Term 2021

Scope

The Bachelor Seminar Energy Economics is designed for students who have already taken courses in Energy Economics and are considering to write their Bachelor Thesis in this field. Students will work on an energy economics related topic independently. You will receive information about how to write an academic paper in Economics, and how to give a scientific presentation. Based on the input through the seminar, students choose a topic, give a presentation, and compose a literature review on this topic.

Schedule

Note: The schedule was updated. A skill session was added on May 4th.
